

JUL 1983

CHARTER OF THE WORKSTATION ENVIRONMENT WORKING GROUP  
OF THE CIA INFORMATION SYSTEMS BOARD

- Assess the requirements (or lack of need) for automated workstations excluding stand alone word processors of Agency personnel by job category.
- Develop the requirements and a range of options for combining word and data processing in a single workstation/terminal.
- Determine the capabilities needed, and a range of options for, an Agency workstation/terminal that is flexible enough to meet the needs of all but the most esoteric Agency users.
- Analyze the costs and benefits of a standardized workstation/terminal, a family of compatible terminals, or user freedom in terminal selection.
